In the Specification

Please amend the paragraph appearing at page 14, lines 4 through 12, as follows:

At step 512 514, the ICS 40 presents a capacity request to the operator. At step 516, the ICS 40 receives capacity information from the operator regarding the capacity for a particular type of subscriber. At decisional step 518, a determination is made regarding whether or not there are more types of subscribers based on information provided by the operator. If there are more types of subscribers, the method follows the Yes branch from decisional step 518 and returns to step 514 where the ICS 40 presents a capacity request for another type of subscriber. However, if there are no more types of subscribers, the method follows the No branch from decisional step 518 to step 520.
